

PROJECT SCOPE STATEMENT	
Project Name	EventBuds
Project Deliverables	Detailed Description
UI structure	<ul style="list-style-type: none"> • Sticky or header navbar on mobile application which allows users to switch to different tabs • burger menu to view all tabs listed and select them • Notification Icon for getting new notifications
Home Page/ Dashboard	<ul style="list-style-type: none"> • Create events from home page • View Upcoming and past events • view necessary information regarding the event on card
Friends Tab	<ul style="list-style-type: none"> • Search for friends and add new friends within this tab • View list of current friends • view more details about friend after clicking on that card • take actions for any friends account like unfriend them
Create Event Page	<ul style="list-style-type: none"> • Create a form which will include entity like event name, start and finish date and time, location, privacy, description, adding helper and guests. • Character limit on description and title • For private events, helpers can only be added which are already in my friend list. • For private events, guests can be either from the friends list or we can send an external guest invitation for guests that are not yet included into the friends list. We will store that guest information within the app and save for future reference. • Adding total guest limit. • Review and create the event.
Tasks	<ul style="list-style-type: none"> • Creating and editing task in events • Task can only be created by both helper and creator • Task form will have starttime and end time and we can also create checklists within that task • assigning tasks to friends • Completing or updating task status as required
Notifications Page	<ul style="list-style-type: none"> • Notification will show a new invitation request, friend request and helper request. • We can take action from notification like accepting and declining a request
My profile Page	<ul style="list-style-type: none"> • Show user information • Update current public information from this page

Project Exclusions

Because of its large scope and limited time access, we will not be adding features that allow guests to chat, or upload photos and posts within the application. This might be a future consideration.
